DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 58 and 70-100 are drawn to a baseball playing cover area, classified in class 482, subclass 81.
- II Claims 59-69 are drawn to a method of protecting a field, classified in class 473, subclass 451.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method could be used with other playing fields.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to applicant's attorney Matthew R. Jenkins on February 16, 2007 to request an election to the above restriction. The applicant requested the action be mailed for review.

Art Unit: 3711

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
